PROFESSIONAL SUMMARY

Data Scientist with an M.Sc. in Data Science and 2.6+ years of total technical experience (1.2+ years full-time, 1.4+ years internship) specializing in SQL, Python, machine learning, and NLP, alongside Power BI, Tableau, and Advanced Excel. Experienced in database querying, ETL pipeline construction, predictive modeling, MIS process automation, and building pre-sales analytical tools — with a track record of speeding up query processing by 30% and decreasing manual compilation time by 45%. Published NLP research and built deployed ML classification and clustering models achieving 80%+ accuracy.

TECHNICAL SKILLS

Data Engineering & AI/ML: ETL Pipelines, Machine Learning Models, NLP, Data Lineage, Metadata Management, Source-to-Target Mapping

Programming & Databases: SQL (MySQL, PostgreSQL, SQLite), Python (Pandas, NumPy, Matplotlib, Scikit-Learn), PySpark, Flask

Analytics & BI: Power BI, Tableau, Looker Studio, Advanced Excel (VBA, Pivot Tables, ROI Calculators), Power Query, DAX

Machine Learning & MLOps: Deep Learning, TensorFlow/PyTorch, Cross-Validation, A/B Testing, Model Deployment, REST APIs, Git

Automation, Pre-Sales & Cloud: Web-Based Pre-Sales Platforms, Google Apps Script, AppSheet, AWS SageMaker, Cross-Functional Collaboration

EXPERIENCE

Founder and Developer

Jul 2025 – Present

HireHunt (Self-Employed)

Bengaluru, India

- Architected & Deployed a web-based AI referral platform (hirehuntt.in) using Python, Flask, and SQLite, connecting 1,000+ applicants with recruiters.
- Engineered an AI/NLP ATS resume evaluation algorithm and built real-time tracking dashboards for pre-sales screening, securing official MSME (Udyam) registration and copyright.
- Analyzed a dataset of 500+ job-seeker survey entries using Pandas and NumPy to perform statistical analysis and optimize feature prioritization.

MIS Executive (Academic Internship)

Feb 2026 – Jun 2026

Ajay Engineering Tools

Pune, India

- Directed daily operational data workflows across 5+ departments, ensuring 99.5% record integrity and saving 15 staff hours weekly.
- Automated data aggregation routines via Google Apps Script, eliminating manual entry errors and accelerating report turnaround time by 45%.
- Developed 10+ live Looker Studio dashboards to translate daily transaction logs into actionable business metrics for senior leadership.
- Deployed AppSheet mobile forms to digitize shop-floor tracking, boosting cross-team data accuracy by 35% and reducing stock variance by 20% through Root Cause Analysis (RCA).

Data Analyst (Academic Internship)

Jan 2025 – Jun 2025

Internship Studio

Remote

- Validated SQL verification queries across 50,000+ transactional rows, elevating database accuracy metrics by 25%.
- Executed exploratory data analysis (EDA) using Python and Advanced Excel, successfully locating and resolving data discrepancies prior to a major enterprise database migration.
- Standardized audit protocols during cross-functional collaboration across Sales, Marketing, and Consulting teams, evaluating 15+ operational metrics to ensure 100% compliance.

Data Research Analyst (Academic Internship)

Dec 2023 – Mar 2024

Pratiti Technologies

Pune, India

- Enforced data security guidelines and monitored metadata lineage across 120+ enterprise datasets to ensure 100% compliance with internal regulatory policies.
- Designed & Delivered interactive Power BI and Tableau dashboards, leveraging role-based data access and SQL/Python statistical outputs for secure executive reporting.

- Modeled virtual data structures that increased extraction speed by 40%, and trained 4 junior analysts on data auditing, privacy, and security protocols.
- Data Analyst (Academic Internship)**
S4S Tech Services

Jan 2023 – Jun 2023
India

 - Refactored legacy SQL queries to reduce runtime by 30% and utilized Excel Pivot Tables to summarize quantitative outputs for senior management.
 - Built financial liquidity tracking and ROI calculator models using Advanced Excel (VBA Macros, VLOOKUPS, HLOOKUPS), cutting daily review preparation time by 50%.
 - Calculated financial variance metrics across monthly performance files, performing statistical analysis to identify system bottlenecks to lower operating costs by 12%.
 - Conducted database reconciliation checks across multi-source transactional datasets, maintaining system data accuracy above 99%.

PROJECTS & RESEARCH PUBLICATIONS

- Hybrid NLP Pipeline for Real-Time Sentiment Analysis | Python, BERT, Scikit-learn**

Architected a real-time streaming ML pipeline combining rule heuristics with BERT models to process 1,000+ text inputs per second. Built streaming inference pipelines with Scikit-learn and Pandas for anomaly detection; published results in peer-reviewed journal (IJARIE). Applied text tokenization and vectorization methods in Python, achieving sub-100ms latency during live sentiment scoring.

Jan 2024 – Mar 2024
- Customer Churn Predictive Modeling | Python, Scikit-learn, Classification**

Trained machine learning classification models (Logistic Regression, Decision Trees) in Scikit-learn on a 10,000+ row dataset, reaching an 80% overall prediction accuracy rate. Processed raw customer records using advanced outlier handling and feature selection techniques. Computed ROC-AUC, precision, and recall metrics to optimize classification thresholds, providing actionable insights for targeted customer retention initiatives.

Oct 2023 – Dec 2023

EDUCATION

- Master of Science in Data Science**
Dr. D. Y. Patil ACS College, Pune, India

Aug 2023 – May 2025
CGPA: 9.09 / 10.0
- Bachelor of Science in Data Science**
MGM University, Aurangabad, India

Jan 2021 – May 2023
CGPA: 7.81 / 10.0

CERTIFICATIONS & ADDITIONAL INFORMATION

- Certifications: Data Analysis with Python – IBM, Career Essentials in Data Analysis – Microsoft and LinkedIn
- Languages: English (Upper Intermediate B2, Professional Working Proficiency), Hindi, Marathi
